

From the office of **Virendra Rawat**

Letter to all faculty members' VBT group of Institutions- Degree and Diploma programs

Dear faculty members,

I am glad to inform you that our Group of college was preferred by thousands of students to make them qualified for their career since inception of the each college. This year also numbers of meritorious students have preferred our college.

Since we are a group of self financed private colleges where student is educated by taking fee. Since we are working in a cut throat competitive environment therefore we fall in **Survival of the Fittest** category for continuous growth.

I have immense respect towards your wisdom, qualification, experience and perception towards teaching in higher education particularly in technical education.

Our 90% students belong to middle class section of the society. Their economy is very vulnerable. Most of them start planning (saving money) for higher education when their child enters in 5th grade. When they admit their teenage child in technical program their financial plan contains 3 years for Diploma and 4 years for Degree program.

When any child takes more time than their panned time for completion of diploma or degree program , their economical plan misbalanced, which results in financial crisis, social disappointment by falling expectations down , emotional breakdown and so on..... Every parent faces several challenges while educating their children especially in the time of higher education. When a parent of detained students meets you..... Their eyes speaks a lot....., we need to decode and understand the language of their eyes and assisting their eyes to never speak the same again. We need to make every student successful in every set of examinations.

We as group of educators also have the set of social responsibilities beyond our appointment letter. Are we aware about it?

If yeas what initiative we wish to take to accept these responsibilities? Let me inform you that we all belong to the same section of the society. We can definitely contribute l lot by doing too less.....

What we can do? Taking the responsibility of each student to make him/her successful by **Mentoring, Supporting, Educating, Understanding and Honoring.**

That's it.... If you can do this... the society will do a lot for you.... and we will be proud of you

All of My Trustees, Donors, Managers, Administrators, Stakeholders and well wisher of the college and VBT probably shares my views.
